Summary

Friction-fit cap for xacto knife. Also prevents it from rolling away.

[Hobby & Makers](#) > [Tools](#)

Tags: [cover](#) [xacto](#)

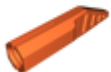

Prints properly (enough) with 0.2mm layer, as oriented.

The cap fits knife with 8.0mm diameter holder (8.3mm diameter knurling). The first few cappings are tight, but it smooths out with a nice “click”.

When capping/removing, hold where the “through-holes” for a better grip and to avoid the blade. Don't stab yourself. (I haven't yet, but it's bound to happen soon.)
